About Magnum Gas & Power Limited

Magnum Gas & Power is an ASX listed energy exploration and development company with a portfolio of projects including Coal Bed Methane (CBM) and Petroleum exploration in Botswana and Coal Seam Gas (CSG) exploration in New South Wales, Australia.

Magnum's priority is exploration drilling in the Central Project Area of its highly prospective CBM projects in Botswana where recent drilling resulted in the discovery of Coal and Coal Bed Methane. A combination of exploration wells and desktop studies will seek to add value by defining and converting resources to reserves. Magnum's prospecting licences are strategically placed in the Kalahari Karoo basin which is in the early stages of field development with significant exploration programmes being conducted by neighbouring global energy majors.

Existing power generation facilities in Botswana's critical power market are currently awaiting CBM gas supply. Magnum will look to vertical integration by developing partnering opportunities to provide incremental phases of gas off takes to downstream projects as Reserves are booked.

Magnum is also strategically placed with gas reserves in NSW, ready for further definition and development within a state of looming energy crisis.
